

Supply Management

FRESH, LOCAL, HIGH-QUALITY EGGS – FOR CANADIANS

What is supply management?

It's a system that **manages the supply of eggs**, dairy and poultry.

The system is run by **Canadian farmers**.

The farmers agree to follow a **consistent set of rules** to promote the highest standards for food safety and farming practices, and receive a fair return for their effort.

Who benefits from supply management?

Canadian consumers get eggs that are among the best in the world for **quality and freshness** from **local farmers**.

Canadian communities stay vibrant and successful, because supply management helps strengthen Canadian egg farms, **creating local jobs and opportunities**.

Canadian farmers are the backbone of our country and supply management is an **important part of the survival** of our farms and rural communities.

Food safety

Egg farmers nationwide work with the Canadian Food Inspection Agency, and have implemented a comprehensive on-farm food safety program called **Start Clean-Stay Clean™**. The program includes everything from on-farm inspections, to mandated standards for storage, cleanliness, air quality, feed, record-keeping and more.
