

TAKING CARE OF HENS

How do egg farmers ensure the welfare of their hens?
Through a comprehensive and rigorous national Animal Care Program.

Here are five building blocks to our program:

The Code of Practice

The Code is a national understanding of animal care requirements and recommended practices. It's based on science and developed with a variety of stakeholders.

Verification

The program verifies that farmers follow key animal welfare principles through record keeping and on-farm inspections.

Auditing

Farmers are audited by an independent auditor.

Continuous improvement

New research leads to regular updates to the program and to the Code of Practice.

Farmer commitment

The program works because farmers are committed to caring for their hens.
